

ICOH – International Commission on Occupational Health

Constitution, Article 1, Section 1:

The International Commission on Occupational Health

(ICOH) is an international non-profitmaking, non-political, multidisciplinary scientific organisation whose sole purpose is to foster the scientific progress, knowledge and development

of occupational health and related subjects on an international basis.

ICOH – International Commission on Occupational Health

Constitution, Article 1, Section 2:

ICOH provides a forum for scientific and professional communication. To achieve this purpose, the ICOH:

- sponsors international congresses and meetings on occupational health;
- establishes scientific committees in various fields of occupational health and related subjects;
- disseminates information on occupational health activities;
- issues guidelines and reports on occupational health and related subjects;

ICOH – International Commission on Occupational Health

- collaborates with appropriate international and national bodies on matters concerning occupational and environmental health;
- takes any other appropriate action related to the field of occupational health;
- solicits and administers such funds as may be required in furtherance of its objectives.

occupational health specialist, etc.

ICOH Centennial Declaration

International Commission on Occupational Health - ICOH
Commission Internationale de la Santé au Travail - CIST
Founded in 1906 as Permanent Commission

Centennial Declaration of the International Commission on Occupational Health, ICOH

The Permanent Commission – International Association on Occupational Health, now named International Commission on Occupational Health, ICOH, was founded on 13 June 1906 in Milan by Austrian, French, Bavarian, Belgian, Canadian, Dutch, Hungarian, Italian, Prussian, Swedish, Swiss and UK occupational health scientists and physicians. The aim of the Commission was to promote research on occupational diseases worldwide and disseminate the available knowledge on occupational health to the entire scientific community, to physicians, and practitioners, employers and workers. To achieve these goals it was further decided to regularly hold a Congress every three years. In June 2006, a century after the foundation of ICOH, the occupational health experts once more convene for the Centennial ICOH 2006 Congress in its birthplace, Milan, Italy.

In spite of the impressive progress made in the improvement of health, safety and social conditions of work, in the industrialised countries, the need for occupational health and safety is as evident as it was 100 years ago. While the nature of the problems, hazards and risks has changed the traditional hazards and particularly the new problems of work life still need much expert knowledge, research, training and information in order to be controlled, managed and prevented.

The conditions of work for more than two thirds of the almost three billion workers of the world do not meet the minimum standards and requirements set by the International Labour Organization and the World Health Organization for occupational health, safety and social protection. Over 2 billion workers in the developing countries work under conditions which are hazardous to their health, safety and work ability. Those workers do not have access to occupational health and safety services and are not covered by safety and health inspection. In both the industrialised and developing countries working people are increasingly exposed to time pressure, continuously increasing job demands, frequent reorganization, and job insecurity. This has led to an unreasonable work load, stress-related somatic and mental disorders such as cardiovascular diseases and depression, thus affecting work ability and shortening the work career of ageing workers.

Poor occupational health and safety results in 270 million occupational accidents and 360 000 fatalities and causes 160 million new cases of occupational diseases a year. Altogether these lead annually to 2.3 million deaths of people at their best working age. In principle they all should be preventable. We want to commemorate the millions of people who have lost their lives at work during the past 100 years of industrialization.

The adverse conditions of work constitute an enormous and unnecessary loss of health, work ability, productivity and loss of well-being among working people and their families and communities. The burden to national and company economies is also high amounting to 4–5% of business turnovers and national GDPs.

The globalization process has not succeeded in equalising the conditions of work but in fact the opposite has occurred; the gaps are increasing. Poverty, inequality and under-development are closely associated with the poor safety, health and social conditions of work, as they are also linked with illiteracy, lack of education, poor access to health services and low or non-existent social protection. Sustainable development, equity and elimination of poverty, cannot be achieved without good work ability, safety and health of working people. Moreover, decent conditions of work will ensure work ability and productivity of people and enable them to sustain themselves, their families and communities and to contribute to the national development and GDP.

ICOH 2006*

Seoul Statement on the Development of Occupational Health Services for All

Seoul Statement on the Development of Occupational Health Services for All

The 31st International Congress on Occupational Health, ICOH 2015, was organized by the International Commission on Occupational Health, ICOH, the Korea Occupational Safety and Health Agency, KOSHA, and the Korean Society of Occupational and Environmental Medicine, KSOEM, from 31 May to 5 June 2015 in Seoul, Republic of Korea. The Congress approved a 'Seoul Statement on the Development of Occupational Health Services for All'.

Recalling that decent conditions of work, occupational health and occupational safety constitute a basic human right of workers as declared by the ILO International Covenant on Economic, Social and Cultural Rights of working people (1966), the ILO Declaration on Fundamental Principles and Rights at Work (1998), the Centennial Declaration of the International Commission on Occupational Health, ICOH (2006) and the Seoul Declaration on Safety and Health at Work adopted by the ILO, ISSA, KOSHA and ICOH together with a high number of other Non-Governmental and Professional Associations (2008),

Emphasizing that in spite of positive developments of occupational safety and health particularly in industrialized countries, over three quarters of workers of the world live and work in developing and transitory countries, often working in high risk occupations in both formal and informal sectors, without adequate protection by occupational health and safety law and lacking social protection and access to occupational health services. Such gaps in prevention and protection lead to 2.3 million deaths among the workers of the world every year.

Keeping in mind that the ILO Convention No. 161 on Occupational Health Services and the WHO Global Strategy on Occupational Health for All, as well as the Cancun Charter by the ICOH (2012), call for organization of occupational health services for all working individuals and all occupations, without exclusion of any group of workers, economic sectors, including the informal sector, or workers in contracted or self-employment.

Taking into consideration that new challenges, risks and hazards continuously emerge, due to changes in economic structures, transfer of technologies, demographic changes, migration and social dynamics. The management of and adjustment to the continuous change need active sharing of information, the effective use of existing knowledge, and the generation of new research on occupational health.

Recognizing that a growing body of research evidence speaks for positive economic and productivity impact of occupational health services, due to prevention of loss by accidents and diseases, sickness absenteeism and disabilities, and through facilitation of production processes.

Reminding that according to the principles of the ICOH International Code of Ethics for Occupational Health Professionals, protection and promotion of workers' health is a professional, ethical and social imperative for all occupational health professionals and for the international occupational health community.

The 31st ICOH Congress states the following:

1. Policies

Every government in collaboration with social partners should, as a part of their stewardship, draw up necessary regulations, strategies and programmes for national policies on occupational health and occupational health services by using the international guidance provided by the ILO Convention No. 161, Recommendation No. 171 on Occupational Health Services and the WHO Global Strategy on Occupational Health for All. Such policy should aim at the provision of services for all, with full coverage without exclusion of any group or sector of work life.

2. Implementation

Implementation of occupational health policies should be based on legislation, with appropriate governance structures, well-defined rights and responsibilities, establishment and strengthening of the occupational health system and respective infrastructures, and sufficient resources and financing for services. Special measures, multiple service provision models, including primary health care, and support should be developed for organization of occupational health services for small-scale enterprises, the self-employed and the informal sectors. Public occupational health services should be provided for the underserved sectors. Where front-line services are of limited scope, usually occupational medicine and nursing, they should be reinforced by secondary level support services.

3. Content and activities

The content and activities of occupational health services at the workplace level include prevention and management of physical, chemical, biological and ergonomic factors, prevention of occupational diseases and injuries, prevention of excessive work load, and work life constraints, promotion of health and work ability, rehabilitation and return to work, as well as first aid and curative services. Such services should be adjusted to the health needs of working people, by taking into consideration the existing hazards and responding to the needs of various groups of workers, including young, female, ageing and migrant workers and various types of vulnerable groups.

ICOH GENERAL ASSEMBLY

The General Assembly is the supreme governing body of the ICOH.

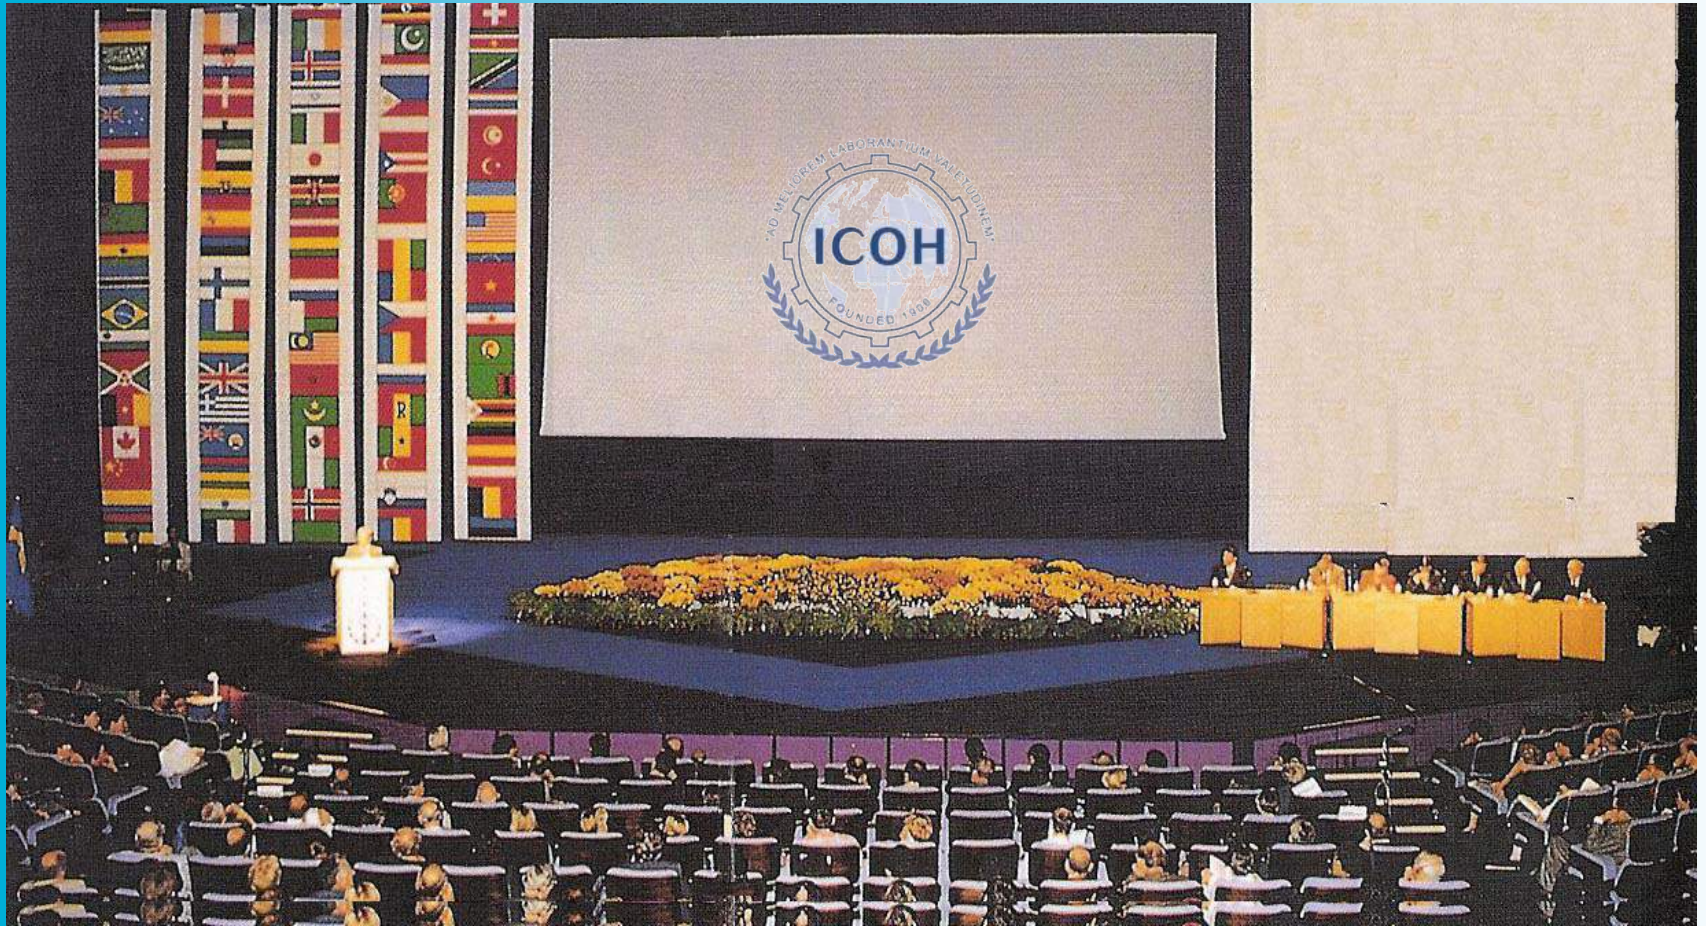

It approves the Constitution, elects honorary members, one Auditor and one Vice-auditor, and decides on the venue of triennial International Congresses.

The General Assembly also sets fees, accepts and approves the financial accounts, accepts the Auditor's report taking such action on it as is necessary, and approves the report on the activities of the Scientific Committees.

It consists of the individual members in good standing and one representative of each collective member.

Tasks of Board Members

These are some of the most important tasks of the Board Members listed in Constitution, article 5, Section 7:

- to review the programme of work of ICOH and its Scientific Committees,
- to assist the Officers,
- to amend the Bye-laws whenever necessary,
- to recommend the venue of future International Congresses on Occupational Health to the General Assembly,
- to recommend the election of honorary members,
- to make recommendations to the President for submission to the General Assembly for its approval,
- to review the accounts.

ICOH CORE DOCUMENTS

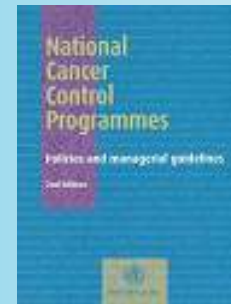

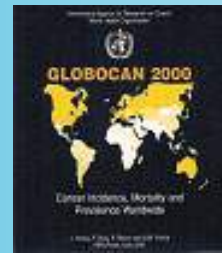

Benefits for ICOH members

- ✓ A substantial reduction of the registration fee of the triennial International Congresses and some other ICOH-sponsored conferences;
- ✓ 20-30% reductions of the subscription rates of international scientific journals such as:

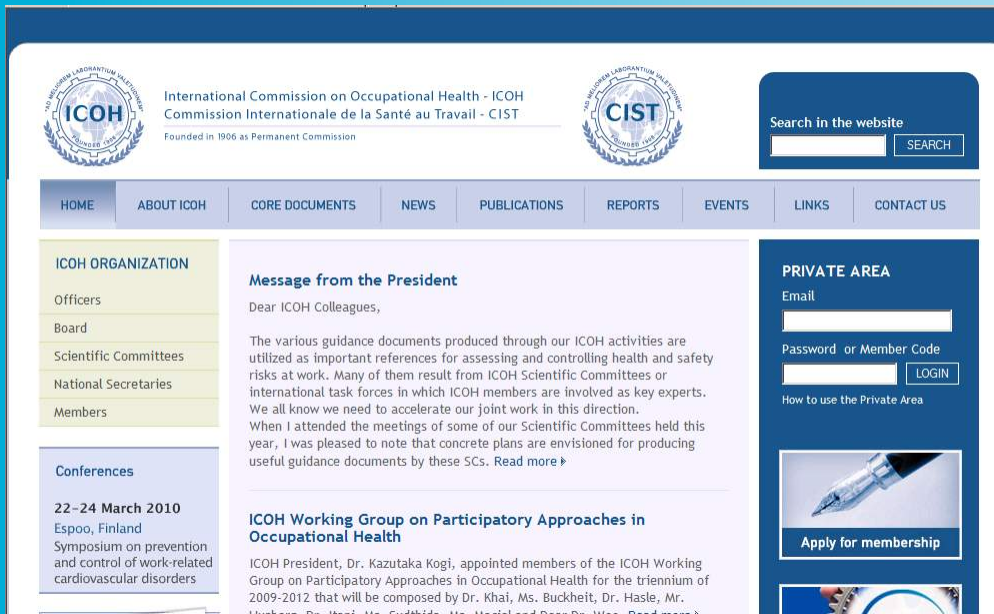

**Applied Ergonomics,
Archives des Maladies Professionnelles,
Dermatoses in Beruf und Umwelt,
La Medicina del Lavoro,
Scandinavian Journal of Work,
Environment and Health**

Benefits for ICOH members

- ✓ 50% reduction in the price of all ILO publications including the Encyclopaedia on Occupational Health and CIS abstracts. 40% reduction on all WHO information products.
- ✓ Epidemiology Journal, is making a discounted subscription offer to ICOH members. Irregularly the ICOH members are offered free scientific publications mainly from the WHO, the UNEP and the CEC.
- ✓ To participate in the activities of up to three of the 35 scientific committees as well as submit materials for publication in the Newsletter.

Benefits for ICOH members

The screenshot shows the ICOH website homepage. At the top, there are logos for ICOH (International Commission on Occupational Health) and CIST (Commission Internationale de la Santé au Travail). Below the logos, the text reads: "International Commission on Occupational Health - ICOH" and "Commission Internationale de la Santé au Travail - CIST". It also states "Founded in 1996 as Permanent Commission". A search bar is located on the right side of the header. The main navigation menu includes: HOME, ABOUT ICOH, CORE DOCUMENTS, NEWS, PUBLICATIONS, REPORTS, EVENTS, LINKS, and CONTACT US. On the left side, there is a sidebar with sections: ICOH ORGANIZATION (Officers, Board, Scientific Committees, National Secretaries, Members), Conferences (22-24 March 2010 Espoo, Finland Symposium on prevention and control of work-related cardiovascular disorders), and a "Message from the President" section. The "Message from the President" section contains text: "Dear ICOH Colleagues, The various guidance documents produced through our ICOH activities are utilized as important references for assessing and controlling health and safety risks at work. Many of them result from ICOH Scientific Committees or international task forces in which ICOH members are involved as key experts. We all know we need to accelerate our joint work in this direction. When I attended the meetings of some of our Scientific Committees held this year, I was pleased to note that concrete plans are envisioned for producing useful guidance documents by these SCs. Read more >". Below this is a section for "ICOH Working Group on Participatory Approaches in Occupational Health" with text: "ICOH President, Dr. Kazutaka Kogi, appointed members of the ICOH Working Group on Participatory Approaches in Occupational Health for the triennium of 2009-2012 that will be composed by Dr. Khai, Ms. Buckheit, Dr. Hasle, Mr. Huberg, Dr. Ibari, Ms. Sudthida, Ms. Majid and Dr. Woo. Read more >". On the right side, there is a "PRIVATE AREA" section with fields for "Email", "Password or Member Code", and a "LOGIN" button. Below this is a section for "Apply for membership" with an image of a pen and a document.

The screenshot shows the ICOH Newsletter cover for Volume 7, Number 3, December 2009. The title "NEWSLETTER" is prominently displayed in the center. Below the title, it says "International Commission on Occupational Health - ICOH" and "Commission Internationale de la Santé au Travail - CIST". The main content area is titled "Message from the President" and features a photograph of the President. The text reads: "Dear ICOH Colleagues, The various guidance documents produced through our ICOH activities are utilized as important references for assessing and controlling health and safety risks at work. Many of them result from ICOH Scientific Committees or international task forces in which ICOH members are involved as key experts. We all know we need to accelerate our joint work in this direction. When I attended some of our Scientific Committee meetings held this year, I was pleased to note that concrete plans are envisioned for producing useful guidance documents by these SCs. The ICOH Task and Working Groups are also planning to generate similarly action-oriented practice guidance. It appears rewarding to expedite our work for producing action-oriented guidance documents in a systematic manner. We are sometimes told that the production of such documents, while they are much needed, is rather slow. There is a clear need to produce them in a timely manner. In responding to this need, it is necessary to exchange our recent experiences, in particular in making a comprehensive risk assessment on the one hand, and building partnership with other actors in our field, on the other. Aiming at Comprehensive Risk Assessment The discussion at the meeting of the SC1 attended this year especially those during the latter half of this year, always touched on the need to provide guidance on comprehensive risk assessment. These meetings were those of the members of ICOH on alcohol and working time, small enterprises and the informal sector, mental health and occupational health in development. I also learned of an in-depth discussion done by other SCs dealing with hazardous risks at work. Members realized that SCs were typically exposed to multiple risks at work, and the need is evident for comprehensive risk assessment that can lead to workplace decisions about priority measures addressing significant risks among the multiple risks. At the workplace level, however, managers and workers who make decisions about priority measures are often not equipped with ready-to-follow procedures to assess significant risks and identify workable countermeasures. We also realize that such procedures need to be adapted to local situations, particularly in small enterprises, in non-regular employment and in rural areas. In response, workplace procedures and support tools are being developed by many SCs to help people implement feasible improvements that can reduce prioritized risks. The SC meetings I attended recently were commonly planning to produce concrete guidance about such comprehensive risk assessment." A table of contents is located on the left side of the newsletter page, listing various articles and their page numbers. At the bottom right, it says "December 2009 01".

✓ Active participation to ICOH website internet platform and its social scientific professional community

✓ Discounted fees for more than 40 among the major International conferences of OSH, in the triennium

✓ Hard copy of newsletter for the members

Message from the President

Dear ICOH Colleagues,

Prominent progress is seen in the ICOH activities for supporting the occupational health practice in many difficult situations. Discussion at the conferences of ICOH Scientific Committees I attended since the last Congress always focused on the practical support measures for comprehensive risk management in underserved sectors. These support measures seem effective when concrete procedures for risk assessment and control are presented. Recent progress is also noted about such procedures for promoting Basic Occupational Health Services (BOHS) and for managing multifaceted risks.

This was typically seen during the ILO/ISSA World Congress on Safety and Health at Work, held in Istanbul last September and at the ICOH Conference on Occupational and Environmental Health in Small and Medium-sized Enterprises (SMEs), held last October in Accra, Ghana by the Scientific Committee on Occupational Health in Small-scale Enterprises and the Informal Sector.

We can learn from the recent developments in action-oriented risk assessment procedures addressing multiple risks usually found in small-scale and informal workplaces. A good combination of workplace observations and the application of qualitative and other simple procedures is shown to lead to many practical improvements in risk reduction. Action-oriented training is being developed for using such procedures for BOHS and SMEs.

In facilitating effective support procedures in this direction, an increasing number of international and regional projects are in progress. Interactive development of such projects is noteworthy.

Trends in hazard monitoring and control

Inter-country projects reported at the Accra and other ICOH-related conferences mostly concerned practical procedures for hazard monitoring and control. For example, comprehensive procedures for addressing physical, chemical and ergonomics-related risks are being developed particularly for small-scale workplaces. Significant progress is seen in facilitating direct observation of high-risk situations or in visualizing serious exposures to physical and chemical hazards. By knowing particularly hazardous operations, the identification of necessary control measures is made easier. In so doing, active participation of employers and workers in following the procedures can be promoted.

The wider use of action-oriented training tools for improving small-scale workplaces is also noteworthy. Participatory training is successful when action-form checklists and easy-to-understand guides are used for proposing practical risk-reducing improvements. These tools are utilized to focus on locally feasible improvements that have real impacts on risk reduction.

Benefit: Key Notes of ICOH Congresses

The screenshot shows a web browser window displaying the ICOH website. The browser's address bar shows the URL: http://www.ichweb.org/site_new/ico_member_corner_keynotes.asp. The website header includes the ICOH logo on the left and the CIST logo on the right, with the text: "International Commission on Occupational Health - ICOH / Commission Internationale de la Santé au Travail - CIST / Founded in 1906 as Permanent Commission". A search bar is located in the top right corner with the text "Search in the website" and a "SEARCH" button. Below the header is a navigation menu with links: HOME, ABOUT ICOH, CORE DOCUMENTS, NEWS, PUBLICATIONS, REPORTS, EVENTS, LINKS, CONTACT US. The main content area is titled "KEY NOTES" and features a "View details" section with a search input and a dropdown menu set to "All". The "Key Notes Index" lists several keynotes with their titles, authors, and dates, each accompanied by a PDF icon:

- Adopting a New Paradigm: Work Disability Prevention:** Disability , quality of life, work exclusion, economic burden, productivity loss
Patrick Loisel, March 27, 2009 - ICOH 2009
- Codes of ethics in occupational health - are they important?:** Ethics, Occupational Health
Peter Westerholm, March 27, 2009 - ICOH 2009
- Occupational Safety and Health Issues in Africa:** The global social challenge, Africa, Developing Countries
Frank Muchiri, March 27, 2009 - ICOH 2009
- Disaster, humanitarian aid and occupational risks:** Aid workers: risks and security, Factors influencing natural disasters
Louis Loutan, March 26, 2009 - ICOH 2009
- OHS Compensation and Prevention Laws: Pieces of the Same Puzzle:** OHS legislation, Policy Objectives, Challenge
Paul Benjamin, March 26, 2009 - ICOH 2009
- Pandemic and HIV/AIDS, an update:** New emerging infections in humans
Barry D Schoub, March 26, 2009 - ICOH 2009
- Assessment and communication of old and new hazards and risks :** Assessment and communication, Old, emergent and new risks

The browser's taskbar at the bottom shows the system tray with the date and time: 15:45, 02/03/2012. The taskbar also displays the Internet Explorer logo and the text "Internet | Modalità protetta: disattivata".

Benefit: ICOH Centennial Heritage

The screenshot shows a web browser window titled "ICOH Centennial heritage - Windows Internet Explorer". The address bar displays the URL "http://www.icohweb.org/site_new/heritage/default.asp". The browser's address bar includes a search icon and the Google logo. The page content is framed by a dark blue navigation bar with the following links: "ICOH Home Page", "Main Menu", "Chronology", "Core Documents", "Congresses", "ICOH Organisation", "Methodological Notes", "Credits", "Contacts", and "Search".

The main content area features the ICOH logo on the left and the CIST logo on the right. The central text reads: "International Commission on Occupational Health - ICOH" and "Commission Internationale de la Santé au Travail - CIST", followed by "Founded in 1906 as Permanent Commission". Below this, the title "ICOH Centennial Heritage" is displayed. The page is organized into three main sections, each with a representative image and a corresponding button:

- ICOH Organization:** Represented by a collage of historical photographs, including portraits of men and a group of people.
- Chronology:** Represented by a stack of documents and a circular logo with the text "1906 2006" and "MILAN - ITALY".
- Congresses:** Represented by a collage of historical photographs showing industrial scenes and groups of people.
- Core Documents:** Represented by an open book showing text from a document.

At the bottom of the page, the copyright notice reads: "© Copyright 2009 - International Commission on Occupational Health". The browser's status bar at the bottom shows "Internet | Modalità protetta: disattivata", a zoom level of "100%", and the system clock displaying "15:56 02/03/2012".

ICOH APPLICATION FORM: HOW TO BECOME AN ICOH MEMBER
The International Commission on Occupational Health (ICOH) is an international non-governmental organization dedicated to the advancement of scientific progress, knowledge, and development of occupational health and safety.

ICOH's Purposes: to enhance the knowledge of members in the field of occupational health

- To generate and disseminate scientific knowledge in occupational health.
- To support and promote the use of knowledge in occupational health practice and in training.
- To generate and maintain the highest standards of moral and professional commitment to the health and safety of workers and their families.

Benefits for ICOH members:

- Substantial reduction of the registration fee of the triennial International Congresses, including ICOH 2006 (see "Registration" chapter) and some other ICOH-sponsored conferences.
- Reductions of the subscription rates of international scientific journals (20-30%), on the price of all ILO publications (50%) and on all WHO information products (40%).
- Participation in the activities of up to three of the 35 scientific committees as well as submit materials for publication in the Newsletter.

ICOH Accomplishments
ICOH activities cover a wide range of topics, as reflected by the 35 ICOH Scientific Committees and 3 Collaborative Activities. Some of these are of chemical, physical or ergonomic exposures; others take up health issues, services and methods in different occupational practices, set other focus on accidents and disease prevention, and more recently work organization and psychosocial factors, and unemployment and health.

Application form for membership (please write in BLOCK LETTERS)

Name: Last First Middle Title
Sex: Male Female Nationality: Date of birth:
Present Position: Organization:
Street:
