

# **ICOH – International Commission on Occupational Health**

## **Constitution, Article 1, Section 1:**

**The International Commission on Occupational Health**

**(ICOH) is an international non-profitmaking, non-political, multidisciplinary scientific organisation whose sole purpose is to foster the scientific progress, knowledge and development**

**of occupational health and related subjects on an international basis.**

# ICOH – International Commission on Occupational Health

## Constitution, Article 1, Section 2:

**ICOH provides a forum for scientific and professional communication. To achieve this purpose, the ICOH:**

- sponsors international congresses and meetings on occupational health;
- establishes scientific committees in various fields of occupational health and related subjects;
- disseminates information on occupational health activities;
- issues guidelines and reports on occupational health and related subjects;

# ICOH – International Commission on Occupational Health

- collaborates with appropriate international and national bodies on matters concerning occupational and environmental health;
- takes any other appropriate action related to the field of occupational health;
- solicits and administers such funds as may be required in furtherance of its objectives.

industrial medical officers,  
occupational health specialist, etc.

# ICOH Centennial Declaration

International Commission on Occupational Health - ICOH  
Commission Internationale de la Santé au Travail - CIST  
Founded in 1906 as Permanent Commission

## Centennial Declaration of the International Commission on Occupational Health, ICOH

The Permanent Commission – International Association on Occupational Health, now named International Commission on Occupational Health, ICOH, was founded on 13 June 1906 in Milan by Austrian, French, Bavarian, Belgian, Canadian, Dutch, Hungarian, Italian, Prussian, Swedish, Swiss and UK occupational health scientists and physicians. The aim of the Commission was to promote research on occupational diseases worldwide and disseminate the available knowledge on occupational health to the entire scientific community, to physicians, and practitioners, employers and workers. To achieve these goals it was further decided to regularly hold a Congress every three years. In June 2006, a century after the foundation of ICOH, the occupational health experts once more convene for the Centennial ICOH 2006 Congress in its birthplace, Milan, Italy.

In spite of the impressive progress made in the improvement of health, safety and social conditions of work, in the industrialised countries, the need for occupational health and safety is as evident as it was 100 years ago. While the nature of the problems, hazards and risks has changed the traditional hazards and particularly the new problems of work life still need much expert knowledge, research, training and information in order to be controlled, managed and prevented.

The conditions of work for more than two thirds of the almost three billion workers of the world do not meet the minimum standards and requirements set by the International Labour Organization and the World Health Organization for occupational health, safety and social protection. Over 2 billion workers in the developing countries work under conditions which are hazardous to their health, safety and work ability. Those workers do not have access to occupational health and safety services and are not covered by safety and health inspection. In both the industrialised and developing countries working people are increasingly exposed to time pressure, continuously increasing job demands, frequent reorganization, and job insecurity. This has led to an unreasonable work load, stress-related somatic and mental disorders such as cardiovascular diseases and depression, thus affecting work ability and shortening the work career of ageing workers.

Poor occupational health and safety results in 270 million occupational accidents and 360 000 fatalities and causes 160 million new cases of occupational diseases a year. Altogether these lead annually to 2.3 million deaths of people at their best working age. In principle they all should be preventable. We want to commemorate the millions of people who have lost their lives at work during the past 100 years of industrialization.

The adverse conditions of work constitute an enormous and unnecessary loss of health, work ability, productivity and loss of well-being among working people and their families and communities. The burden to national and company economies is also high amounting to 4–5% of business turnovers and national GDPs.

The globalization process has not succeeded in equalising the conditions of work but in fact the opposite has occurred; the gaps are increasing. Poverty, inequality and under-development are closely associated with the poor safety, health and social conditions of work, as they are also linked with illiteracy, lack of education, poor access to health services and low or non-existent social protection. Sustainable development, equity and elimination of poverty, cannot be achieved without good work ability, safety and health of working people. Moreover, decent conditions of work will ensure work ability and productivity of people and enable them to sustain themselves, their families and communities and to contribute to the national development and GDP.

ICOH 2006*

# Seoul Statement on the Development of Occupational Health Services for All

## Seoul Statement on the Development of Occupational Health Services for All

The 31<sup>st</sup> International Congress on Occupational Health, ICOH 2015, was organized by the International Commission on Occupational Health, ICOH, the Korea Occupational Safety and Health Agency, KOSHA, and the Korean Society of Occupational and Environmental Medicine, KSOEM, from 31 May to 5 June 2015 in Seoul, Republic of Korea. The Congress approved a 'Seoul Statement on the Development of Occupational Health Services for All'.

### Recalling

that decent conditions of work, occupational health and occupational safety constitute a basic human right of workers as declared by the ILO International Covenant on Economic, Social and Cultural Rights of working people (1966), the ILO Declaration on Fundamental Principles and Rights at Work (1998), the Centennial Declaration of the International Commission on Occupational Health, ICOH (2006) and the Seoul Declaration on Safety and Health at Work adopted by the ILO, ISSA, KOSHA and ICOH together with a high number of other Non-Governmental and Professional Associations (2008).

### Emphasizing

that in spite of positive developments of occupational safety and health particularly in industrialized countries, over three quarters of workers of the world live and work in developing and transitory countries, often working in high risk occupations in both formal and informal sectors, without adequate protection by occupational health and safety law and lacking social protection and access to occupational health services. Such gaps in prevention and protection lead to 2.3 million deaths among the workers of the world every year.

### Keeping in mind

that the ILO Convention No. 161 on Occupational Health Services and the WHO Global Strategy on Occupational Health for All, as well as the Cancun Charter by the ICOH (2012), call for organization of occupational health services for all working individuals and all occupations, without exclusion of any group of workers, economic sectors, including the informal sector, or workers in contracted or self-employment.

### Taking into consideration

that new challenges, risks and hazards continuously emerge, due to changes in economic structures, transfer of technologies, demographic changes, migration and social dynamics. The management of and adjustment to the continuous change need active sharing of information, the effective use of existing knowledge, and the generation of new research on occupational health.

### Recognizing

that a growing body of research evidence speaks for positive economic and productivity impact of occupational health services, due to prevention of loss by accidents and diseases, sickness absenteeism and disabilities, and through facilitation of production processes.

### Reminding

that according to the principles of the ICOH International Code of Ethics for Occupational Health Professionals, protection and promotion of workers' health is a professional, ethical and social imperative for all occupational health professionals and for the international occupational health community.

The 31<sup>st</sup> ICOH Congress states the following:

### 1. Policies

Every government in collaboration with social partners should, as a part of their stewardship, draw up necessary regulations, strategies and programmes for national policies on occupational health and occupational health services by using the international guidance provided by the ILO Convention No. 161, Recommendation No. 171 on Occupational Health Services and the WHO Global Strategy on Occupational Health for All. Such policy should aim at the provision of services for all, with full coverage without exclusion of any group or sector of work life.

### 2. Implementation

Implementation of occupational health policies should be based on legislation, with appropriate governance structures, well-defined rights and responsibilities, establishment and strengthening of the occupational health system and respective infrastructures, and sufficient resources and financing for services. Special measures, multiple service provision models, including primary health care, and support should be developed for organization of occupational health services for small-scale enterprises, the self-employed and the informal sectors. Public occupational health services should be provided for the underserved sectors. Where front-line services are of limited scope, usually occupational medicine and nursing, they should be reinforced by secondary level support services.

### 3. Content and activities

The content and activities of occupational health services at the workplace level include prevention and management of physical, chemical, biological and ergonomic factors, prevention of occupational diseases and injuries, prevention of excessive work load, and work life constraints, promotion of health and work ability, rehabilitation and return to work, as well as first aid and curative services. Such services should be adjusted to the health needs of working people, by taking into consideration the existing hazards and responding to the needs of various groups of workers, including young, female, ageing and migrant workers and various types of vulnerable groups.

# ICOH GENERAL ASSEMBLY

The General Assembly is the supreme governing body of the ICOH.

It approves the Constitution, elects honorary members, one Auditor and one Vice-auditor, and decides on the venue of triennial International Congresses.

The General Assembly also sets fees, accepts and approves the financial accounts, accepts the Auditor's report taking such action on it as is necessary, and approves the report on the activities of the Scientific Committees.

It consists of the individual members in good standing and one representative of each collective member.

Message from the President

Dear ICOH Colleagues,

Prominent progress is seen in the ICOH activities for supporting the occupational health practice in many difficult situations. Discussion at the conferences of ICOH Scientific Committees I attended since the last Congress always focused on the practical support measures for comprehensive risk management in underserved sectors. These support measures seem effective when concrete procedures for risk assessment and control are presented. Recent progress is also noted about such procedures for promoting Basic Occupational Health Services (BOHS) and for managing multifaceted risks.

This was typically seen during the ILO/ISSA World Congress on Safety and Health at Work, held in Istanbul last September and at the ICOH Conference on Occupational and Environmental Health in Small and Medium-sized Enterprises (SMEs), held last October in Accra, Ghana by the Scientific Committee on Occupational Health in Small-scale Enterprises and the Informal Sector.

We can learn from the recent developments in action-oriented risk assessment procedures addressing multiple risks usually found in small-scale and informal workplaces. A good combination of workplace observations and the application of qualitative and other simple procedures is shown to lead to many practical improvements in risk reduction. Action-oriented training is being developed for using such procedures for BOHS and SMEs.

In facilitating effective support procedures in this direction, an increasing number of international and regional projects are in progress. Interactive development of such projects is noteworthy.

Trends in hazard monitoring and control

Inter-country projects reported at the Accra and other ICOH-related conferences mostly concerned practical procedures for hazard monitoring and control. For example, comprehensive procedures for addressing physical, chemical and ergonomics-related risks are being developed particularly for small-scale workplaces. Significant progress is seen in facilitating direct observation of high-risk situations or in visualizing serious exposures to physical and chemical hazards. By knowing particularly hazardous operations, the identification of necessary control measures is made easier. In so doing, active participation of employers and workers in following the procedures can be promoted.

The wider use of action-oriented training tools for improving small-scale workplaces is also noteworthy. Participatory training is successful when action-form checklists and easy-to-understand guides are used for proposing practical risk-reducing improvements. These tools are utilized to focus on locally feasible improvements that have real impacts on risk reduction.

# Benefit: Key Notes of ICOH Congresses

The screenshot displays the website of the International Commission on Occupational Health (ICOH) and Commission Internationale de la Santé au Travail (CIST). The browser window shows the URL [http://www.icohweb.org/site\\_new/ico\\_member\\_corner\\_keynotes.asp](http://www.icohweb.org/site_new/ico_member_corner_keynotes.asp). The page features a navigation menu with options like HOME, ABOUT ICOH, CORE DOCUMENTS, NEWS, PUBLICATIONS, REPORTS, EVENTS, LINKS, and CONTACT US. A search bar is located in the top right corner. The main content area is titled 'KEY NOTES' and includes a 'View details' section with a search filter set to 'All'. Below this, a 'Key Notes Index' lists several keynotes with their titles, authors, and dates, each accompanied by a PDF icon. The list includes:

- Adopting a New Paradigm: Work Disability Prevention:** Disability , quality of life, work exclusion, economic burden, productivity loss. Patrick Loisel, March 27, 2009 - ICOH 2009
- Codes of ethics in occupational health - are they important?:** Ethics, Occupational Health. Peter Westerholm, March 27, 2009 - ICOH 2009
- Occupational Safety and Health Issues in Africa:** The global social challenge, Africa, Developing Countries. Frank Muchiri, March 27, 2009 - ICOH 2009
- Disaster, humanitarian aid and occupational risks:** Aid workers: risks and security, Factors influencing natural disasters. Louis Loutan, March 26, 2009 - ICOH 2009
- OHS Compensation and Prevention Laws: Pieces of the Same Puzzle:** OHS legislation, Policy Objectives, Challenge. Paul Benjamin, March 26, 2009 - ICOH 2009
- Pandemic and HIV/AIDS, an update:** New emerging infections in humans. Barry D Schoub, March 26, 2009 - ICOH 2009
- Assessment and communication of old and new hazards and risks :** Assessment and communication, Old, emergent and new risks

The bottom of the screenshot shows the Windows taskbar with the system clock at 15:45 on 02/03/2012.

# Benefit: ICOH Centennial Heritage

The screenshot shows a web browser window titled "ICOH Centennial heritage - Windows Internet Explorer". The address bar displays the URL "http://www.icohweb.org/site\_new/heritage/default.asp". The browser's address bar shows several tabs, including "ICOH - International Com...". The website content is displayed within a white frame on a blue background. At the top of the frame, a navigation menu includes links for "ICOH Home Page", "Main Menu", "Chronology", "Core Documents", "Congresses", "ICOH Organisation", "Methodological Notes", "Credits", "Contacts", and "Search". The main content area features the ICOH logo on the left and the CIST logo on the right. The central text reads "International Commission on Occupational Health - ICOH" and "Commission Internationale de la Santé au Travail - CIST", with a sub-note "Founded in 1906 as Permanent Commission". Below this, the title "ICOH Centennial Heritage" is prominently displayed. The page is organized into three main sections, each with a representative image and a corresponding blue button: "ICOH Organization" (top center, with a photo of a group of people), "Chronology" (bottom left, with a circular logo for the 100th anniversary in Milan, Italy), "Congresses" (bottom center, with a photo of a congress), and "Core Documents" (bottom right, with an image of an open book). A copyright notice at the bottom of the page reads "© Copyright 2009 - International Commission on Occupational Health". The browser's taskbar at the bottom shows the system tray with the date "02/03/2012" and time "15:56".

**ICOH APPLICATION FORM: HOW TO BECOME AN ICOH MEMBER**  
The International Commission on Occupational Health (ICOH) is an international non-governmental organization dedicated to the advancement of scientific progress, knowledge, and development of occupational health and safety.

**ICOH's Purposes:** to enhance the knowledge of members in the field of occupational health

- To generate and disseminate scientific knowledge in occupational health.
- To support and promote the use of knowledge in occupational health practice and in training.
- To generate and maintain the highest standards of moral and professional commitment to the health and safety of workers and their families.

**Benefits for ICOH members:**

- Substantial reduction of the registration fee of the triennial International Congresses, including ICOH 2006 (see "Registration" chapter) and some other ICOH-sponsored conferences.
- Reductions of the subscription rates of international scientific journals (20-30%), on the price of all ILO publications (50%) and on all WHO information products (40%).
- Participation in the activities of up to three of the 35 scientific committees as well as submit materials for publication in the Newsletter.

**ICOH Accomplishments**  
ICOH activities cover a wide range of topics, as reflected by the 35 ICOH Scientific Committees and 3 Collaborative Networks. Some of these are of chemical, physical or ergonomic exposures; others take up health issues, services and methods in different occupational practices, set other focus on accidents and disease prevention, and more recently work organization and psychosocial factors, and unemployment and health.

Application form for membership (please write in BLOCK LETTERS)

**ICQH APPLICATION FORM: HOW TO BECOME AN ICQH MEMBER**

The International Commission on Occupational Health (ICQH) is an international professional organization dedicated to scientific progress, knowledge, and development of occupational health and safety.

Founded in 1988 in Milan, Italy, ICQH currently has over 1,500 members in 95 countries. ICQH is recognized as an international non-governmental organization and has a close working relationship with the International Labour Organization, World Health Organization, International Ergonomics Association, and International Occupational Hygiene Association. ICQH has publications in 10 official languages (en, English and French).

**ICQH's Purposes:** to enhance the knowledge of members in the field of occupational health

- To generate and disseminate scientific knowledge in occupational health.
- To support and provide state-of-the-art knowledge in occupational health practice and in training.
- To generate and maintain the highest standards of moral and professional commitment by the health workers and their services.

**Benefits for ICQH members:**

- Substantial reduction of the registration fee of the triennial International Congresses, "Registration" chapter, and some other ICQH-sponsored conferences.
- Reductions of the subscription rates of international scientific journals (20-30%), on all ILO publications (50%) and on all WHO information products (40%).
- Participation in the activities of up to three of the 35 scientific committees as well as in the Newsletter.

**ICQH Accomplishments**

ICQH activities cover a wide range of topics, as reflected by the 26 ICQH Scientific Committees and 11 Subcommittees. Some of these are in the field of chemical, physical or ergonomic exposures; others take up health issues, services and methods; others focus on accident and disease prevention, and those health work organization and occupational factors.

**Active membership fees for 2005:**

- 20 CHF for countries with a per capita GDP lower than 15,000 US\$
- 80 CHF for countries with a per capita GDP higher than 15,000 US\$

Check your country data on [www.icqh.org](http://www.icqh.org)!
